# 2008

The diagram illustrates a river network with cells containing numerical values. The network starts from the top left and flows towards the bottom right. The cells are arranged in a grid-like pattern, with some cells containing numerical values. The values are: 100, 80, 100, 80, 60, 80, 100, 80, 100, 120, 100, 140, 120, 140. Red arrows indicate the flow direction, showing a main channel and several tributaries. The flow starts from the top left, moves down and right, then turns left, then right, and finally down and right again. The arrows are red and have a double-line tail.
